

ArcelorMittal

Environmental Policy USA

ArcelorMittal USA aspires to be the most admired steel company in North America. We are committed to the responsible management of our assets in a way that minimizes environmental impact.

We believe that a focus on strong environmental management is an integral part of the way we operate and will strengthen our business performance and support a sustainable future for our stakeholders.

We will drive our actions with this framework to support our policy:

The guiding principles of ArcelorMittal USA's Environmental Policy are to:

- Implementation and maintenance of **environmental management systems** that support the achievement of this policy, including ISO 14001 certification for all production facilities;
- **Compliance** with all relevant legislation, regulations, and other requirements;
- Minimizing our environmental impact, including our **CO2 footprint** where technologically and economically feasible, through **continual improvement** of our equipment and process management capabilities;
- Seeking to use our resources efficiently: **Preventing pollution** by minimizing emissions and waste generation, and through the efficient use of **natural resources, energy and land**;
- Establishing and maintaining practices, including audits and the setting of **environmental objectives**, to ensure adherence to this policy;
- **Employee awareness** of their individual roles and responsibilities with respect to achieving our environmental goals;
- **Supplier and contractor awareness** and adherence to ArcelorMittal USA's environmental policy;
- **Open communication** with stakeholders affected by ArcelorMittal USA's operations, whether they are employees, customers, suppliers, shareholders or communities.

PROTECT AND IMPROVE THE ENVIRONMENT
