A new production line in Válcovny plechu

23.4.2007

By the end of March the subsidiary company of Mittal Steel Ostrava - VÁLCOVNY PLECHU signed the contract with Italian TECHINT for the new heat insulation coating line for steel strips.

The total price of the line is close to CZK 150 million. This line is an inseparable part of the process flow and it will be followed by investments in other lines processing low carbon steel strip for transformer steel and dynamo steel. The company target is to increase the electro-sheets capacity up to 100 000 tons per year.
